This is to certify that my company has fitted one of your FGD100 filter units.

The problem was that the fast cruiser concerned had a very badly contaminated fuel tank that was inaccessible for cleaning (Built into hull with no access).

The customer was replacing the fuel filter after every five to six hours of use.

The Engine concerned was a 1.7 Mercruiser Diesel.

The fitting of your filter was without difficulty and to date has totally solved the problem.

Many thanks.
